

An Overview of Servlet & JSP Technology

Originals of Slides and Source Code for Examples:
<http://courses.coreservlets.com/Course-Materials/csajsp2.html>

Customized Java EE Training: <http://courses.coreservlets.com/>
Servlets, JSP, JSF 2.0, Struts, Ajax, GWT 2.0, Spring, Hibernate, SOAP & RESTful Web Services, Java 6.
Developed and taught by well-known author and developer. At public venues or onsite at *your* location.

3

**For live Java EE training, please see training courses
at <http://courses.coreservlets.com/>.**

Servlets, JSP, Struts, JSF 1.x, JSF 2.0, Ajax (with jQuery, Dojo, Prototype, Ext-JS, Google Closure, etc.), GWT 2.0 (with GXT), Java 5, Java 6, SOAP-based and RESTful Web Services, Spring, Hibernate/JPA, and customized combinations of topics.

Taught by the author of *Core Servlets and JSP*, *More Servlets and JSP*, and this tutorial. Available at public venues, or customized versions can be held on-site at your organization. Contact hall@coreservlets.com for details.

Agenda

- **What servlets and JSP are all about**
 - Understanding the role of servlets
 - Building Web pages dynamically
 - Evaluating servlets vs. other technologies
 - Understanding the role of JSP
- **Testing Tomcat with Eclipse**
 - Installing Tomcat
 - Installing and starting Eclipse
 - Telling Eclipse about Tomcat
 - Deploying and running Web apps from Eclipse
 - Making new Web apps in Eclipse

5

What Servlets and JSP are All About

Customized Java EE Training: <http://courses.coreservlets.com/>

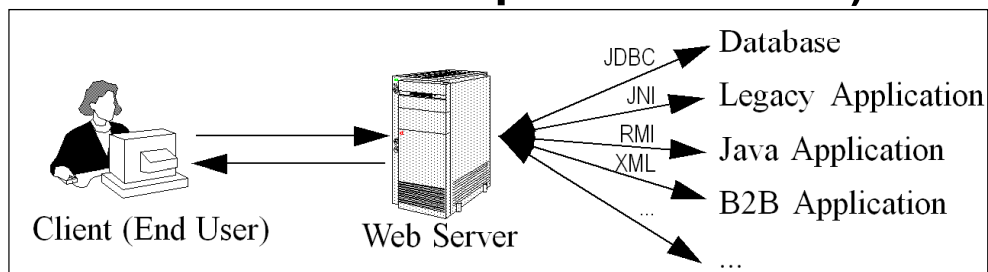

Servlets, JSP, JSF 2.0, Struts, Ajax, GWT 2.0, Spring, Hibernate, SOAP & RESTful Web Services, Java 6.

Developed and taught by well-known author and developer. At public venues or onsite at *your* location.

6

A Servlet's Job

- Read explicit data sent by client (form data)
- Read implicit data sent by client (request headers)
- Generate the results
- Send the explicit data back to client (HTML)
- Send the implicit data to client (status codes and response headers)

7

Why Build Web Pages Dynamically?

- **The Web page is based on data submitted by the user**
 - E.g., results page from search engines and order-confirmation pages at on-line stores
- **The Web page is derived from data that changes frequently**
 - E.g., a weather report or news headlines page
- **The Web page uses information from databases or other server-side sources**
 - E.g., an e-commerce site could use a servlet to build a Web page that lists the current price and availability of each item that is for sale.

8

The Advantages of Servlets Over “Traditional” CGI

- **Efficient**
 - Threads instead of OS processes, one servlet copy
- **Convenient**
 - Lots of high-level utilities
- **Powerful**
 - Sharing data, pooling, persistence
- **Portable**
 - Run on virtually all operating systems and servers
- **Inexpensive**
 - There are plenty of free and low-cost servers
- **Secure**
 - No shell escapes, no buffer overflows
- **Mainstream**
 - See next page

From Randall Munroe and xkcd.com

9

Mainstream

- **Popular:**
 - The single most common use of Java technology
 - The leading technology for medium/large Web applications
 - Google reports over 650 million Web pages using JSP
- **Supported by:**
 - Apache, Oracle, IBM, Sybase, BEA, Jetty, Caucho, Sun, New Atlanta, ATG, Fujitsu, Lutris, Silverstream, the World Wide Web Consortium (W3C), and many others
 - Plugins for IIS and Zeus
- **Runs on:**
 - Windows, Unix/Linux, MacOS, VMS, and IBM mainframe OSs
- **Used for:**
 - Airline companies, hotels, e-commerce sites, search engines, banks, financial sites, etc., etc., etc.

10

Ten Most Popular Web Sites (Alexa.com, Summer 2010)

- | | |
|---|---|
| 1. Google <ul style="list-style-type: none">– Java (Web), C++ (indexing) | 6. Baidu <ul style="list-style-type: none">– Unknown |
| 2. Facebook <ul style="list-style-type: none">– PHP | 7. Wikipedia <ul style="list-style-type: none">– PHP |
| 3. YouTube <ul style="list-style-type: none">– Flash, Python, Java | 8. Blogger <ul style="list-style-type: none">– Java |
| 4. Yahoo <ul style="list-style-type: none">– PHP and Java | 9. MSN <ul style="list-style-type: none">– .NET |
| 5. Microsoft Live.com <ul style="list-style-type: none">– .NET | 10. Twitter <ul style="list-style-type: none">– Ruby on Rails, Scala, Java |

11

Keywords in Job Postings

12

Extending the Power of Servlets: JavaServer Pages (JSP)

- **Idea:**

- Use regular HTML for most of page
- Mark dynamic content with special tags
- Details in second half of course

```
<!DOCTYPE HTML PUBLIC "-//W3C//DTD HTML 4.0 Transitional//EN">
<HTML>
<HEAD><TITLE>Welcome to Our Store</TITLE></HEAD>
<BODY>
<H1>Welcome to Our Store</H1>
<SMALL>Welcome,
<!-- User name is "New User" for first-time visitors -->
<%= coreservlets.Utils.getUserNameFromCookie(request) %>
To access your account settings, click
<A HREF="Account-Settings.html">here.</A></SMALL>
<P>
Regular HTML for rest of on-line store's Web page
</BODY></HTML>
```

13

Accessing the Online Documentation

- **Servlets and JSP**

- <http://docs.coreservlets.com/servlet-3.0-api/>
 - Servlets 3.0 and JSP 2.2 (Tomcat 7)
- http://java.sun.com/products/servlet/2.5/docs/servlet-2_5-mr2/
 - Servlets 2.5 (Tomcat 6)
- http://java.sun.com/products/jsp/2.1/docs/jsp-2_1-pfd2/
 - JSP 2.1 (Tomcat 6)

- **Java 6**

- <http://java.sun.com/javase/6/docs/api/>
 - Class uses Java 6 and Tomcat 7

- **Advice**

- If you have a fast and reliable internet connection, bookmark these addresses
- If not, download a copy of the APIs onto your local machine and use it

14

Setting Up Tomcat on Your PC

- **Tomcat 7 with Eclipse**
 - <http://www.coreservlets.com/Apache-Tomcat-Tutorial/tomcat-7-with-eclipse.html>
 - Or, just follow link at top left of www.coreservlets.com
 - More details in next section of this tutorial
- **Tomcat 6 with Eclipse**
 - <http://www.coreservlets.com/Apache-Tomcat-Tutorial/>
- **For manual execution**
 - <http://www.coreservlets.com/Apache-Tomcat-Tutorial/>
 - More details in last section.
 - Eclipse or another IDE *strongly* recommended
- **Bottom line**
 - Unzip Tomcat, then point Eclipse at the install folder

15

Installing Tomcat

For even more detailed step-by-step instructions, see tutorials on using Eclipse with Tomcat 6 or Tomcat 7 at <http://www.coreservlets.com/Apache-Tomcat-Tutorial/>

Customized Java EE Training: <http://courses.coreservlets.com/>
Servlets, JSP, JSF 2.0, Struts, Ajax, GWT 2.0, Spring, Hibernate, SOAP & RESTful Web Services, Java 6.
Developed and taught by well-known author and developer. At public venues or onsite at *your* location.

16

Download and Unzip

- **Start at <http://tomcat.apache.org>**
 - Choose download link on left, then ZIP version
 - Tomcat 7 (recommended)
 - Tomcat 6 (if you need compatibility with older servers)
- **Or, go to <http://www.coreservlets.com/>**
 - Choose Tomcat tutorial from top left
 - This is preconfigured version
 - Set for development, not deployment mode
 - Port changed to 80, servlet reloading enabled, directory listings turned on, etc.
 - Otherwise unchanged
- **Either way, just unzip the file**
 - E.g., resulting in C:\apache-tomcat-7.0.0

17

Installing Eclipse

For even more detailed step-by-step instructions, see tutorials on using Eclipse with Tomcat 6 or Tomcat 7 at <http://www.coreservlets.com/Apache-Tomcat-Tutorial/>

Customized Java EE Training: <http://courses.coreservlets.com/>
Servlets, JSP, JSF 2.0, Struts, Ajax, GWT 2.0, Spring, Hibernate, SOAP & RESTful Web Services, Java 6.
Developed and taught by well-known author and developer. At public venues or onsite at *your* location.

18

Installing Eclipse

• Overview

- Eclipse is a free open source IDE for Java. Support for Java, HTML, CSS, JavaScript, C++, PHP, and more.
- <http://eclipse.org/downloads/>
- Choose “Eclipse IDE for Java EE Developers”
 - Need version 3.6 (Helios) for Tomcat 7

• Features

- Checks your syntax as you type
- Automatically compiles every time you save file
- Many tools: refactoring, debugging, server integration, templates for common tasks, etc.
- Low learning curve: beginners can use Eclipse without knowing these tools

Reminder: step-by-step guide at <http://www.coreservlets.com/> (click “Apache Tomcat 7” in top left).

Running Eclipse

- **Unzip the downloaded file**
 - Call the folder you unzip into “installDir”

- **Double click eclipse.exe**

- From *installDir/bin*

- **Click on “Workbench” icon**

- Next time you bring up Eclipse, it will come up in workbench automatically

- **Shortcut**

- Many developers put Eclipse link on their desktop
 - R-click eclipse.exe, Copy, then go to desktop, R-click, and Paste Shortcut (not just Paste!)

Configuring Eclipse

- **Tell Eclipse about Java version**

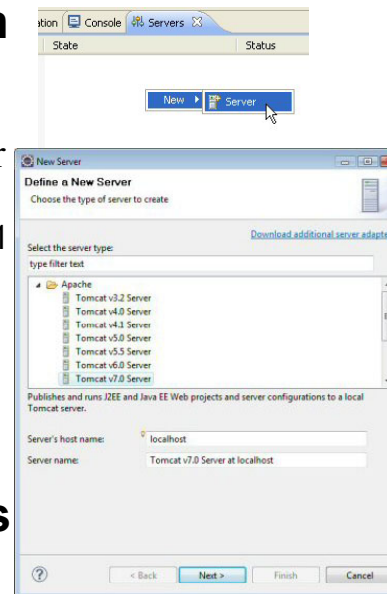

- Window → Preferences → Java → Installed JREs → Press “Add”, choose “Standard VM”, navigate to JDK folder (not “bin” subdirectory)
 - E.g., C:\Program Files\Java\jdk1.6.0_21

- **Tell Eclipse about Tomcat**

- Click on Servers tab at bottom. R-click in window.
- New, Server, Apache, Tomcat v7.0, Next, navigate to folder, Finish.

- **Suppress serializable warnings**

- Window → Preferences → Java → Compiler → Errors/Warnings
 - Change “Serializable class without ...” to “Ignore”

Tomcat v7.0 is choice only in Eclipse 3.6 (Helios). If you prefer Tomcat 6, choose Tomcat v6.0 above instead. If you lose the “Servers” tab at the bottom of Eclipse, use Window, Show View, and hunt for “Servers”.

21

Deploying Apps from Eclipse

Customized Java EE Training: <http://courses.coreservlets.com/>

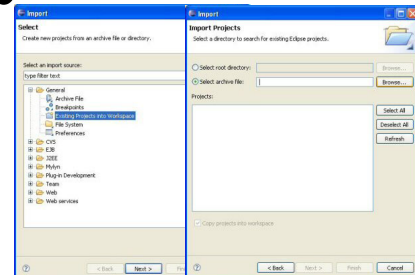

Servlets, JSP, JSF 2.0, Struts, Ajax, GWT 2.0, Spring, Hibernate, SOAP & RESTful Web Services, Java 6.

Developed and taught by well-known author and developer. At public venues or onsite at *your* location.

22

Download and Import Sample Project

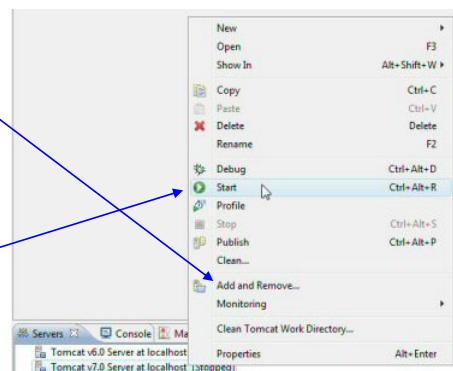

- **Get test-app.zip from coreservlets.com**
 - Start at servlet and JSP tutorials
 - <http://courses.coreservlets.com/Course-Materials/csajsp2.html>
 - Go to first section (Overview and Setup)
 - Or, start at Apache Tomcat tutorial
 - <http://www.coreservlets.com/Apache-Tomcat-Tutorial/>
 - Choose Tomcat 7 (recommended) or Tomcat 6 version
- **Then, download test-app.zip**
 - Then, import into Eclipse.
 - File, Import, General, Existing Projects, Select archive file. Then click Browse and navigate to test-app.zip.

23

Deploying App in Eclipse

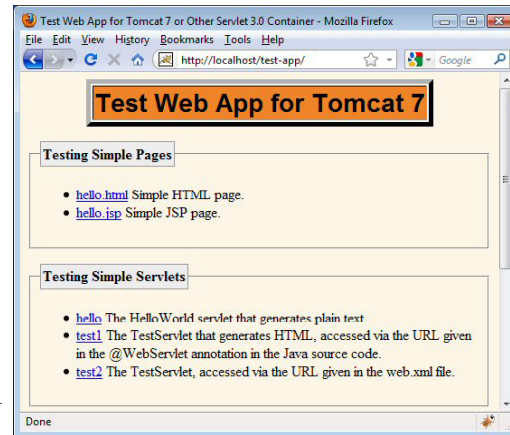

- **Deploy project**
 - Select “Servers” tab at bottom
 - R-click on Tomcat
 - Choose “Add and Remove”
 - Choose project
 - Press “Add”
 - Click “Finish”
- **Start Server**
 - R-click Tomcat at bottom
 - Start (use “Restart” if Tomcat already running)
- **Test URL**
 - <http://localhost/test-app/> in any Web browser

24

Testing Deployed App in Eclipse

- **Start a browser**
 - Eclipse also has builtin browser, but I prefer to use Firefox or Internet Explorer
- **Test base URL**
 - `http://localhost/test-app/`
- **Test Web content**
 - `http://localhost/test-app/hello.html`
 - `http://localhost/test-app/hello.jsp`
- **Test servlets**
 - `http://localhost/test-app/hello`
 - `http://localhost/test-app/test1`
 - `http://localhost/test-app/test2`

25

Making New Apps from Eclipse

Customized Java EE Training: <http://courses.coreservlets.com/>
Servlets, JSP, JSF 2.0, Struts, Ajax, GWT 2.0, Spring, Hibernate, SOAP & RESTful Web Services, Java 6.
Developed and taught by well-known author and developer. At public venues or onsite at *your* location.

26

Making Web Apps in Eclipse

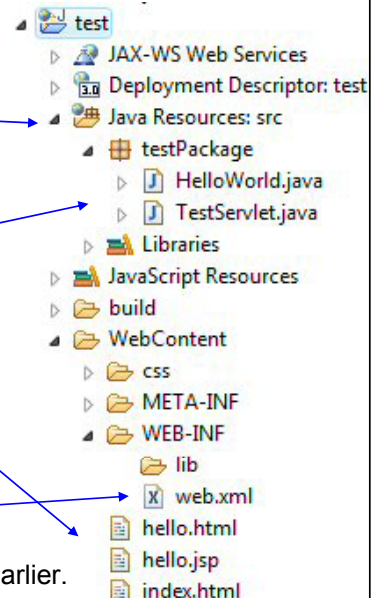

- **Make empty project**
 - File → New → Project → Web → Dynamic Web Project
 - For “Target runtime”, choose “Apache Tomcat v7.0”
 - Give it a name (e.g., “test”)
 - Accept all other defaults
- **Shortcut**
 - If you have made Dynamic Web Project recently in workspace, you can just do File → New → Dynamic Web Project

27

Adding Code to Eclipse Projects

- **Locations**
 - Java Resources: src
 - R-click and New → Package
 - Never use default package
 - src/testPackage
 - Java code in testPackage package
 - WebContent
 - Web files (HTML, JavaScript, CSS, JSP, images, etc.)
 - WebContent/some-subdirectory
 - Web content in subdirectory
 - R-click on WebContent, New → Folder
 - WebContent/WEB-INF
 - web.xml
 - Optional with servlets 3.0. Required in 2.5 & earlier.
 - Will be discussed later
- **Note**
 - Can cut/paste or drag/drop files into appropriate locations

28

Testing New App

- **Follow same procedure as “deploying app” from previous section**
 - Deploy project
 - Select “Servers” tab at bottom
 - R-click on Tomcat
 - Choose “Add and Remove”
 - Choose project
 - Press “Add”
 - Click “Finish”
 - Start Server
 - R-click Tomcat at bottom
 - Restart (use “Start” if Tomcat not already running)
 - Test URL
 - `http://localhost/appName/` in any Web browser

29

Summary

- **General**
 - Servlets are efficient, portable, powerful, and widely accepted in industry
 - Regardless of deployment server, run a free server on your desktop for development
 - Using Eclipse greatly simplifies development and deployment
- **Getting started**
 - Start with test-app and TestServlet from coreservlets.com
 - Click on “Intermediate Servlets and JSP” tutorial in top-left corner and you can get pre-made Eclipse projects

34

Questions?

Customized Java EE Training: <http://courses.coreservlets.com/>

Servlets, JSP, JSF 2.0, Struts, Ajax, GWT 2.0, Spring, Hibernate, SOAP & RESTful Web Services, Java 6.
